“ ABOUT ME

I am an enterprising student of Final Year Computer Engineering, who loves building web applications. I'm a developer and musician by passion, an engineer by profession, and a photographer by interest. My motto of being determined towards the software world and its development for the betterment of the standard of living of society encouraged me to take up engineering as a profession.

EXPERIENCE

HaleAI

Full Stack Developer

March 2020 - Present

HaleAI aims to assist in faster and more accurate diagnoses in the healthcare industry using artificial intelligence. I worked on developing the entire website from scratch and also developed and managed a web app - Covid detection, Brain Tumor Detection, etc.

Technologies: HTML, CSS, JS, jQuery, Bootstrap, Python, Flask, AWS (S3 and EC2), Firebase, SQLite

Website link: hale-ai.com

Cardinal LCA

Frontend Developer

July 2021 - Present

Cardinal LCA aims to reduce the environmental impact caused by the Architecture, Engineering & Construction industry. I am currently working on developing the entire website from scratch.

Technologies: HTML, CSS, JS, jQuery, Bootstrap, Python, Flask, SQLite

Website link: cardinallca.com

Team FullStack

Founder & Director

March 2020 - Present

We are a team of 3 FullStack web developers aiming to cater to enthusiastic developers from all over the world, an effective perspective of learning, by helping improve their skill set.

PROJECTS

EntreSpace Website entrespace.in

This is my first client project, that I developed as a freelancer. This project gave me a head-start in building big websites in pure CSS. I also used jQuery for some required functionalities.

Google Search Landing Page anirudhbelwadi.com/Google-Landing-Page

This was the first project I developed to understand CSS and its use in making sites responsive.

Netflix Clone netflix-clone-63163.web.app

This is a Netflix Clone that I built using ReactJS. I used Firebase, TMDB API to power the authentication and the content, respectively.

Amigos Social Media Portal github.com/anirudhbelwadi/Amigos-Social-Media-Portal

This is a Social Media Website that my team built as a mini-project in our 5th semester of Engineering. We used technologies like: Python, Flask, Bootstrap, AWS (S3).

Soundlogy - Genre Detection App github.com/anirudhbelwadi/music-application-using-machine-learning

This is a music genre detection web application we developed as a mini project in our Semester 6 of B.E. Computer Engineering.

Aaradhy Services Website aaradhyaservices.in

This is my second client project, that I developed as a freelancer using Bootstrap.

SKILLS

Front-End: HTML5, CSS, JS, Bootstrap, ReactJS

Back-End: Python (Flask), Java, PHP

Database: SQLite, PostgreSQL

Deployment Platforms: AWS, GCP

Softwares: Photoshop, Lightroom, Premiere Pro, Rush, Illustrator
