SUMMARY

Mid-level Cloud and Systems Engineer with experience in architecting scalable distributed systems, automating multi-cloud infrastructure and driving continuous operational reliability. Master of Information Systems Management graduate from Carnegie Mellon University with 2+ years of full-time software engineering experience building high-throughput backend services and orchestrating public cloud deployments. Engineered fault-tolerant serverless architectures, established enterprise-wide observability frameworks and streamlined end-to-end cloud operations using Terraform, Python, AWS, Azure and Kubernetes to minimize system downtime and accelerate delivery pipelines.

EDUCATION

Carnegie Mellon University

Master of Information Systems Management (GPA: 3.60 | Dean's List)

Pittsburgh, United States of America

August 2024 – December 2025

- **Relevant Courses:** Cloud Computing, Distributed Systems, Advanced Relational Database Management, Object Oriented Analysis & Design, Web Application Development, NoSQL Database Management, IT Project Management, Agile Methods
- Research assistant in CMU Safe AI Lab (Dr. Ding Zhao): built ReactJS UI for an energy-domain LLM chatbot and dataset visualization using [kepler.gl](https://github.com/safeai-lab); improved lab website (safeai-lab.github.io) performance by 95%

Mumbai University

Bachelor of Engineering in Computer Engineering (GPA: 3.73)

Mumbai, India

June 2018 – June 2022

- **Relevant Courses:** Data Structures, Analysis of Algorithms, Operating Systems, Database Management, Advanced Algorithms, Distributed Computing, Discrete Mathematics
- Built a technical community of 400+ engineers, while being the Campus Lead for Google Developers Student Clubs and hosted 10+ tech-based skill builder events
- Awarded “Most Enterprising Student” Award in the First Year, 2018 - 2019; “Student of the Year” Award in the Final Year, 2021 - 2022

SKILLS

Programming and Scripting Languages: Java, Python, TypeScript, C, SQL, PL/SQL

Backend & Systems: Spring Boot, Flask, Django, FastAPI, REST APIs

Cloud & Infra: AWS (IAM, Lambda, SQS, SNS, RDS, EC2, CloudFormation, CloudWatch, S3, SAM), Azure (Entra ID, Migrate, Virtual Machines, Monitor, Virtual Networks, Resource Manager, Site Recovery), GCP (IAM, Compute Engine, Cloud Storage), Docker, Kubernetes, Jenkins, Temporal, Terraform, ArgoCD, CI/CD

Databases: MySQL, PostgreSQL, Oracle SQL, SQLite, Redis, MongoDB, DynamoDB, AVEVA PI

Developer Tools: Git, GitHub, GitFarm, Postman

EXPERIENCE

Sushi+FrenchFries (a product of Beacon Street Studios)

Pittsburgh, United States of America

Junior Full Stack Engineer

July 2026 – Present

- **Observability:** Designed and led a company-wide Sentry integration rollout by standardizing error capture across ~39 backend routes, closing instrumentation blind spots and wiring environment/release (git SHA) tracking into dev/staging/prod deploy configs
- **Public API product:** Built and shipped a versioned public API for third-party integration by designing structured endpoints, standardizing duration units across the contract, extracting a reusable collage-decomposition module, migrating key management to Supabase and launching hosted API documentation
- **Cost optimization:** Audited S3 storage usage, identified waste and designed data lifecycle/retention policies with a reconciliation script to drive cloud storage costs down

DartIQ.ai

Pittsburgh, United States of America

AI Engineering Intern

February 2026 – June 2026

- **Migration Orchestration:** Built Temporal workflows and CLI tooling to orchestrate wave-based VMware-to-Azure migrations across 50+ VM batches in parallel
- **AI Tooling Integration:** Engineered a Python-based MCP server to accelerate AI tool integration, cutting pipeline response times by 35%
- **Integration Testing:** Built an end-to-end testing framework with a local microservice stack to seed test data and validate workflows, cutting debugging time by ~40%

Manufacturing Futures Institute

Pittsburgh, United States of America

Software Development Engineer Intern

September 2025 – December 2025

- **Polyglot Persistence Architecture:** Designed a unified Retrieval API spanning PostgreSQL, AVEVA PI (time-series), key-value stores and object storage, enabling independent schema evolution across heterogeneous manufacturing workloads
- **RESTful API Development:** Built scalable Flask APIs and database connectors exposing metadata, historian and file-system data, supporting time-series analytics and asset lifecycle tracking across 5+ research teams
- **Data Modeling & Indexing:** Defined data models, API contracts and indexing that improved query performance and consistency, reducing ad-hoc access effort for researchers

Amazon.com Inc.

Bellevue, United States of America

Software Development Engineer Intern

May 2025 – August 2025

- **Serverless Event-Driven Architecture:** Designed a distributed system using AWS Lambda, SQS and SNS to decouple compute-intensive workloads from latency-sensitive APIs, handling 200K+ requests/hour at peak; Deployed all the services using AWS SAM with proper modelling and testing
- **Latency Optimization:** Reduced p99 API latency by ~90% via an asynchronous precomputation pipeline, improving reliability and response times at scale
- **Fault Tolerance:** Implemented retries, dead-letter queues and idempotency controls to handle message duplication and partial failures with zero data loss
- **Operational Excellence:** Drove design reviews & production-readiness discussions, shaping decisions on scalability, failure modes and observability for a high-traffic system

Reliance Jio Platforms Limited

Mumbai, India

Software Development Engineer

July 2022 – April 2024

- **Microservices Development:** Built Java Spring Boot microservices on MyJio, a consumer super-app serving 500M+ users, with a focus on low-latency request handling and high-availability design
- **Scalable Backend Services:** Built horizontally scalable services for authentication, user data management and service orchestration, supporting staged rollouts and safe deployments for 100M+ active sessions
- **Observability & Reliability:** Introduced structured logging, health checks and monitoring dashboards, reducing mean time-to-detect (MTTD) for distributed failures by ~35%
- **Performance Troubleshooting:** Investigated and resolved critical performance bottlenecks via log analysis, metrics review and load profiling to prevent service outages

PROJECTS

Gulf Services & Industrial Supplies LLC

Muscat, Oman

Inventory Management System

June 2022 – July 2022

- Designed and implemented a Python + SQL inventory system to track 25K+ SKUs across 18 locations, automating transactional consistency and audit reconciliation
- Reduced annual audit effort by ~300 hours through automated data validation pipelines and discrepancy reporting

LearnCarbon

Copenhagen, Denmark

ML Plugin for Sustainable Building Design

October 2021

- Built a Rhino/Grasshopper plugin using a trained regression model to predict Global Warming Potential (GWP) directly from abstract early-stage building design parameters, enabling architects to evaluate carbon impact before detailed modeling
- Trained & validated model on a curated dataset of building material and geometry features; achieved prediction accuracy sufficient for comparative design-stage decision-making
- Won "Best Project to Solve a Major AEC Problem" among 13 finalist teams; authored and presented a technical paper at the eCAADe 2022 international conference (Belgium)
- Website, Codebase and research paper: [learncarbon.github.io](https://github.com/learncarbon) | <https://github.com/LearnCarbon> | bit.ly/LearnCarbonResearchPaper

AWARDS AND ACHIEVEMENTS

- **1st Place, Global Student Entrepreneur Awards (GSEA), (Vizag, India; 2022):** Competed against top 50 student entrepreneurs nationwide at the Entrepreneurs' Organization (eonetwork.org) national finals; recognized for founding Team FullStack (teamfullstack.in), training 200+ students in web development and delivering real-world projects for SME clients including CSR initiatives for LTIMindtree and Tata Consultancy Services.
